

Name list-applications– lists deployed applications

Synopsis list-applications [--help] [--type *type*]

Description The `list-applications` subcommand lists deployed Java EE applications and the type of each application that is listed. The possible types are listed in the Options section of this help page. If the `--type` option is not specified, all applications are listed.

This subcommand is supported in remote mode only.

Options `--help`

Displays the help text for the subcommand.

`--type`

Specifies the type of the applications that are to be listed. The options are as follows:

- `application` (default)
- `appclient`
- `connector`
- `ejb`
- `jruby`
- `web`
- `webservice`

If no type is specified, all applications are listed.

Examples EXAMPLE 1 Listing the Web Applications

```
asadmin> list-applications --type web
hellojsp <web>
Command list-applications executed successfully
```

Exit Status 0 subcommand executed successfully

1 error in executing the subcommand
